# IBM 8275 Fast Ethernet Workgroup Switch Models 318, 322 and 326

## Highlights

- Three models offering copper and fiber flexibility
- 100BASE-FX and 10/100BASE-TX client-side ports
- 1000BASE-SX Gigabit Ethernet and 100BASE-FX uplink options for high-speed to backbone or server
- RMON support for events, alarms, history and statistics
- Automatic MAC addressing aging
- Simple Network Management Protocol (SNMP) and Web-based management
- Support for 8192 MAC addresses per switch
- High-performance Ethernet LAN switching
- Available in a convenient rack-mountable desktop unit
- VLAN support
- Full- and half-duplex operations
- Port-trunking and port-mirroring capabilities

## Features and Benefits

- Provides high-speed connectivity between switches to reduce network bottlenecks and increase bandwidth
- Offers Web-based management, which allows HTML and Java™-based management of the switch
- Flexible fiber/copper configurations

## Key Selling Points

- Ideal for medium- to large-sized workgroups that require the flexibility of 10/100 Mbps or 100BASE-FX client attachments along with high-speed uplink and server capabilities
- Industry-leading fiber price and density
- Superior mixed media fiber/copper solutions
