IBM Nways Workgroup Manager for Windows NT
Frequently Asked Questions

Q1 I am interested in managing my network remotely from a Web browser. What Web browsers are supported by Nways Workgroup Manager for Windows NT?

A1 Nways Workgroup Manager for Windows NT supports browsers that are enabled for JavaSoft JDK 1.1. The current list of JavaSoft-JDK-1.1-enabled browsers is:

- **HotJava™** by JavaSoft (`https://web.archive.org/web/19970806155601/http://www.javasoft.com/`, search on "browser")

As other browsers that support JDK 1.1 become available this list will be updated.

Q2 I need the ability to download new microcode to my networking devices from my Windows NT workstation. Where can I get a TFTP server for Windows NT?

A2 Nways Workgroup Remote Monitor for Windows provides a TFTP server. If you don't have Nways Workgroup Remote Monitor for Windows and would like a TFTP server to use with Nways Workgroup Manager then you can download a special version of IBM eNetwork Network Station Manager TCP/IP for Windows NT from `https://web.archive.org/web/19970806155601/http://www.networking.ibm.com/nwy/nwytcp.html`. This version of the server can only be used on the same machine as Nways Workgroup Manager for Windows NT.

Q3 What are the recommended workstation requirements for Nways Workgroup Manager for Windows NT?

A3 The recommended workstation requirements are:

Hardware

- Pentium Processor (minimum of 133MHz)
- 64 MB of RAM
- 100 MB of free disk space for application files (more disk space is required for large networks or monitoring many historical statistics)
- 150 MB disk space for virtual memory paging files
- SVGA high-resolution (1024 x 768) workstation monitor support
- Network interface card supported by Windows NT TCP/IP
- CD-ROM drive
- 3.5-inch diskette drive
- Mouse supported by Windows NT Version 4.0

Software

- Microsoft Windows NT Version 4.0 operating system (for Intel 486, or higher, processors) with TCP/IP support installed.
- IBM Nways RouteSwitch Network Manager program, if you intend to manage the IBM 8274 Nways LAN RouteSwitch. Nways Workgroup Manager supports the IBM Nways 8274 LAN RouteSwitch by invoking IBM Nways RouteSwitch Network Manager.
